Plan. Build. Ship.

DevTrack is a project tracker for software teams. Issues, boards, cycles and an AI agent in one fast, quiet workspace, so a team always knows what's next and what's done.

This guide is the single source of truth for how DevTrack looks. It covers the logo, colors, typography, UI components, icons and the navy dark mode. Use it when you design a screen, write a slide, make a social post or brief anyone who works on the brand.

The full asset pack (logos, icons, favicons, social images and a ready-made theme file) ships with this PDF in `assets.zip`.

Clear

Every screen answers one question: what's the state of the work? No decoration that hides it.

Focused

Navy carries the brand quietly. Green is rare, so it always means something: done, go, primary action.

Forward

Things rise and move right. Progress is the story the brand tells.

Built for developers

Keyboard first, honest numbers, monospace IDs, no fluff.

The Board mark

D for DevTrack · 1 · To do · 2 · Doing · 3 · Done, always green

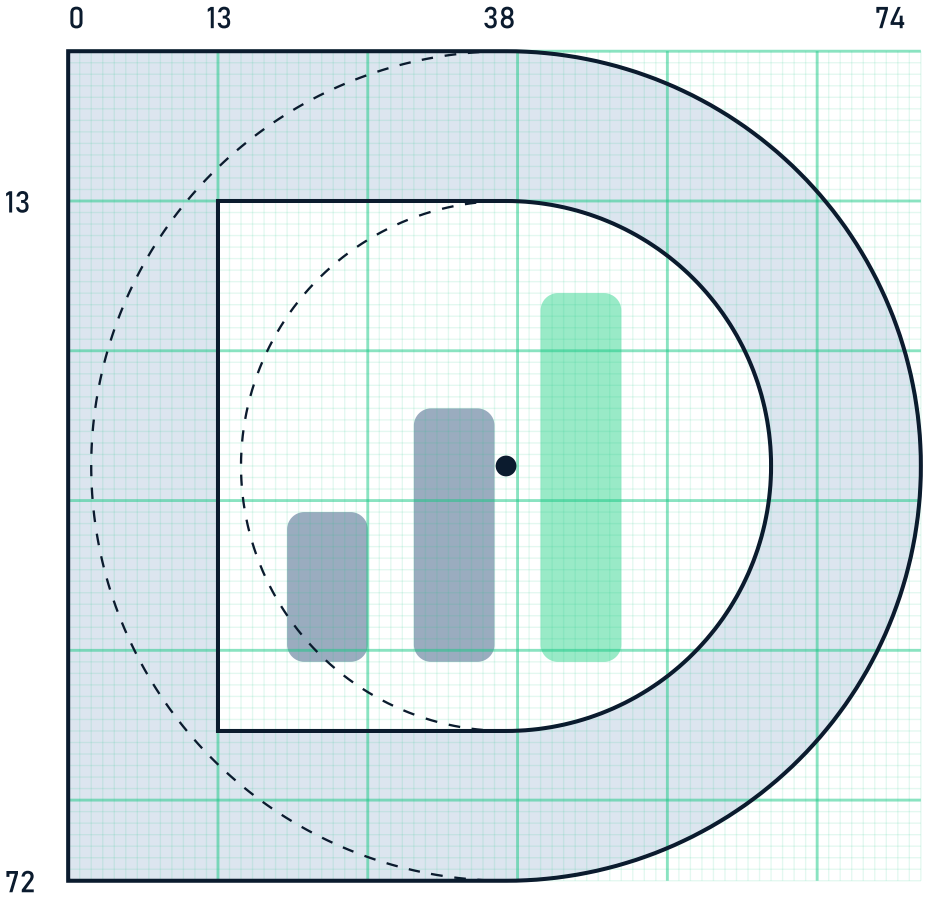

A bold D that holds a team's board.

Inside the D stand three columns, the three stages of every issue: **To do**, **Doing** and **Done**. They rise from left to right, like a growth chart, because DevTrack is about work moving forward.

The last column is **Done Green**. It's the only colored part of the mark, the same green a finished task gets inside the app. The logo and the product speak the same language.

The heavy, geometric D takes its confidence from bold monogram marks: solid shapes, sharp ends, no thin lines. It holds up at 16 pixels and on a billboard.

Construction

Built on a 74 × 72 unit grid.

Stroke of the D	13 units (stem, top and bottom)
Outer bowl	radius 36, centered at (38, 36)
Inner bowl	radius 23, same center
Columns	7 units wide, 4 units apart, 1.5 corner radius
Column heights	13 · 22 · 32 units, sitting on one baseline
Text	None. The mark is the whole logo.

Below 32 px use the **small-size mark** (in the favicon folder). It has two thicker columns so it stays readable.

small-size mark

One mark, no text

The mark is the logo. It never carries text.

A long name next to a symbol makes the logo wide and hard to fit in tabs, sidebars, avatars and app icons. DevTrack uses one compact square mark everywhere, at every size, so it's instantly recognizable on its own, like an app icon on a phone.

App and website header	Mark only, 24–32 px
Favicon, tabs, small UI	Small-size mark, 16–32 px
Splash, covers, posters	Mark only, large and centered
Social avatars	Mark on a navy tile

When the name is needed (a page title, a sentence, an email signature), write **DevTrack** as normal text in Inter SemiBold, separate from the logo. Don't build a combined “logo + name” lockup.

DevTrack

Example: app sidebar. Mark + name set in the UI font.

Color versions

Full color Navy + green on white or Mist. The default.

Reversed White + green on Deep Navy. Dark mode, covers, social.

Full color on Mist For soft section backgrounds.

Navy one-color Single-color print, stamps, engraving, fax.

On Done Green Navy with a white done column. Campaigns only.

White one-color On photos or busy, mid-tone backgrounds.

Clear space & minimum size

Give the logo room to breathe.

Clear space on every side = **2x**, where **x** is the thickness of the D's stroke (13 of 72 units, about 18% of the mark's height). Nothing goes inside that zone: no text, edges, photos or other logos.

Full mark	min. 32 px on screen · 10 mm in print
Small-size mark	16–32 px · 5–10 mm
Below 16 px	Don't use the logo

shown at minimum print size

Logo misuse

Don’t stretch or squash it.

Don’t rotate or tilt it.

Don’t recolor it with off-brand colors.

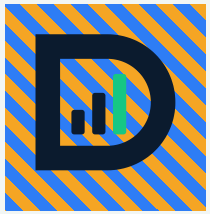

Don’t move the green. Only the last (Done) column is green.

Don’t use pure black. The brand dark is Deep Navy.

Don’t add shadows, glows, bevels or gradients.

Don’t place it on busy backgrounds without contrast.

Don’t build a logo + name lockup. The mark stands alone.

Core palette

Deep Navy

Primary brand color. Text, headings, the logo, dark-mode backgrounds.

HEX	#0B1B2E
RGB	11, 27, 46
HSL	213°, 61%, 11%
CMYK	76, 41, 0, 82

Done Green

Accent. Primary buttons, done states, links on dark, the Done column.

HEX	#16C784
RGB	22, 199, 132
HSL	157°, 80%, 43%
CMYK	89, 0, 34, 22

Mist

Soft light background for sidebars, sections and cards on white.

HEX	#F2F6F4
RGB	242, 246, 244
HSL	150°, 18%, 96%
CMYK	2, 0, 1, 4

White

Main light background and text on navy.

HEX	#FFFFFF
RGB	255, 255, 255
HSL	0°, 0%, 100%
CMYK	0, 0, 0, 0

Keep green rare. If more than about a tenth of a screen is green, it stops meaning “go” and “done”.

Navy Navy 900 is the brand. 950–600 build the dark mode surfaces. 500–300 are secondary text and icons. 200–50 are borders, hovers and soft fills on light.

Green Green 500 is the brand. Use 600 for hover/pressed, 700 for green *text* on light backgrounds (500 is too light for small text), 400 for green text on navy, 50–100 for success backgrounds.

Functional colors

Feedback

Role	Fill / icon	Text on light	Dark mode
Success	#0FA56C	#0B8457 4.7:1 · AA	#2BD08F 8.7:1 · AAA
Warning	#F5A524	#9A5B00 5.4:1 · AA	#F7B84B 9.8:1 · AAA
Danger	#D13438	#B42A2E 6.3:1 · AA	#FF6B6E 6.3:1 · AA

Aa DEV-142	Muted on dark popover #8FA3B8 on #1A3250	5.0:1 · AA

Rules

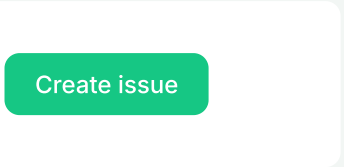

1. **Body text needs 4.5:1** (AA). Large text (24 px+, or 18.5 px bold) and icons need 3:1.
2. **Never put white text on Done Green.** It's only 2.2:1. Use Deep Navy text on green buttons (7.9:1).
3. **Green text on light backgrounds is Green 700**, never Green 500.
4. **Navy 300 placeholders** are for hints only, never for content people need to read.
5. In dark mode, Navy 400 is for decorative icons and disabled states only.
6. **Don't rely on color alone.** Status and priority always pair color with a shape (the icons on the previous page).
7. Focus is always visible: a 2 px Done Green ring with a 2 px offset.

Color do's and don'ts

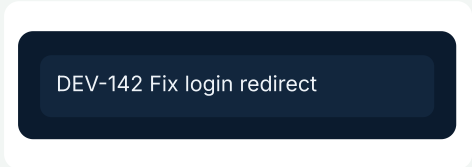

DO **Navy text on green buttons**

Readable everywhere: 7.9:1.

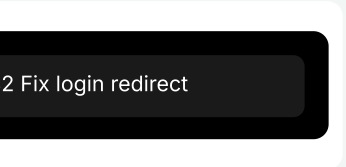

DON'T **White text on green**

Fails accessibility at 2.2:1. Hard to read in sunlight.

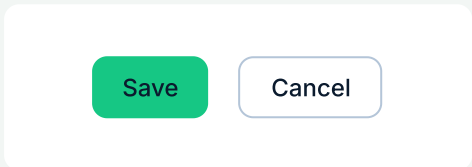

DO **Navy for dark mode**

Deep Navy 900 background, Navy 800 cards, off-white text.

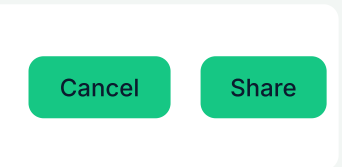

DON'T **Pure black for dark mode**

Black is harsh, off-brand and makes the green look neon.

DO **Green for one key action**

One green button per view. Everything else is quieter.

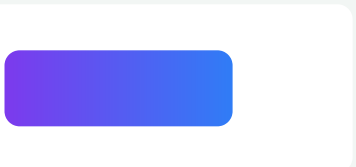

DON'T **Green everywhere**

When everything is green, nothing stands out.

DO **Flat, solid colors**

Solid navy, solid green. Clean and fast.

DON'T **Gradients and off-brand hues**

No purple–blue gradients. They look like every other tool.

Typography

BRAND NAME

DevTrack

The logo has no text. When you write the name, use Inter SemiBold, capital D and T, one word. Never “Devtrack”, “Dev Track” or “DEVTRACK” in body text.

INTERFACE & BODY

Inter

The app's typeface (already set in `app/layout.tsx`). Use 400 for text, 500 for labels, 600 for headings. Never 300 or lighter on navy.

CODE & IDS

DEV-142 · main

Geist Mono for issue IDs, branch names, keyboard shortcuts and numbers that line up.

DISPLAY (MARKETING)

PLAN · BUILD · SHIP

Bahnschrift on Windows, or Barlow (free on Google Fonts) on the web, uppercase with wide tracking. Short lines only: covers, banners, stacked labels.

Type scale (app)

Display	36/40 px · 700	Marketing heroes
H1	28/34 px · 600	Page titles
H2	22/28 px · 600	Section titles
H3	18/24 px · 600	Card / panel titles
Body	14/20 px · 400	Default text
Small	13/18 px · 400	Lists, table rows
Caption	12/16 px · 500	Meta, timestamps
DEV-142	12/16 px · 400	IDs, code, shortcuts

Headings use Navy 900. Body text uses Navy 900 (light) or Navy 50 (dark). Secondary text uses Navy 500 (light) or Navy 300 (dark).

Buttons: light mode

Shape 8 px radius (`--radius: 0.5rem`). Height 32 px default, 28 px small, 40 px large. Label in Inter 500, 13–14 px.

One primary At most one green primary button per view or dialog. Pair it with Outline or Ghost.

Icons in buttons 16 px, same color as the label, 6 px gap. Icon-only buttons need a tooltip and an aria-label.

Buttons: dark mode

	Default	Hover	Pressed	Disabled	Focus	Contrast
Primary	Label #16C784 #0B1B2E	Label #2BD08F #0B1B2E	Label #0FA56C #0B1B2E	Label 40% opacity	Label	7.9:1 · AAA
Secondary	Label #1A3250 #EEF3F8	Label #24405F #EEF3F8	Label #12263D #EEF3F8	Label 40% opacity	Label	11.6:1 · AAA
Outline	Label – #EEF3F8	Label #12263D #EEF3F8	Label #1A3250 #EEF3F8	Label 40% opacity	Label	15.5:1 · AAA
Ghost	Label – #B4C5D8	Label #12263D #EEF3F8	Label #1A3250 #EEF3F8	Label 40% opacity	Label	9.8:1 · AAA
Destructive	Label #D13438 #FFFFFF	Label #B42A2E #FFFFFF	Label #962226 #FFFFFF	Label 40% opacity	Label	4.9:1 · AA
Link	Label – #2BD08F	Label – #52DBA2	Label – #8EE8C1	Label 40% opacity	Label	8.7:1 · AAA

Same green Done Green 500 stays the primary in dark mode, still with navy text. It's the brand anchor in both themes.

Lift with navy Secondary and hover states step *up* the navy scale (800 → 700 → 600). Never grey, never black.

Focus ring 2 px Done Green ring, offset by 2 px of the surface color, in both themes.

Inputs & icons

Inputs

Icons

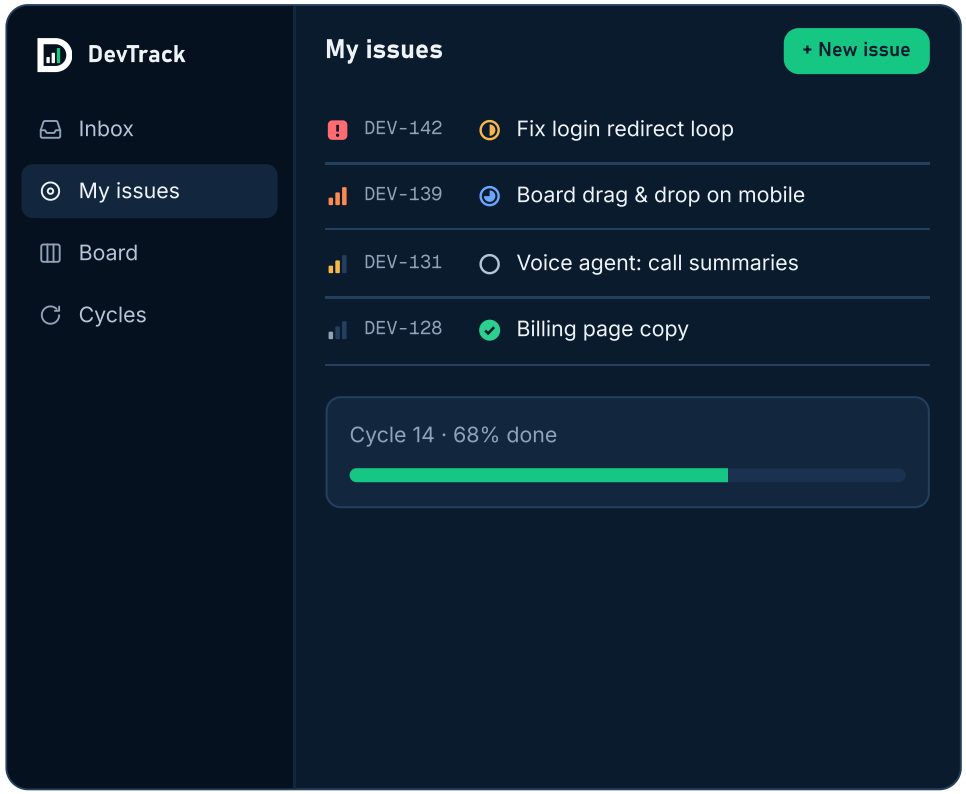

Line icons from **Lucide** (the app's icon set): 1.75 px stroke, round caps and joins, 24 px grid. Use 16 px in lists and buttons, 20 px in navigation, 24 px for empty states.

State	Light	Dark
Default	#4B637D	#8FA3B8
Hover	#0B1B2E	#EEF3F8
Active / selected	#0B8457	#2BD08F
Disabled	#B4C5D8	#24405F

Only status, priority and feedback icons are colored. Everything else follows the text colors above.

Light & navy dark mode

Navy, never black The darkest surface is Navy 950 (sidebar), the canvas is Navy 900. Pure #000 is not part of DevTrack.

Depth by lightness Higher surfaces get lighter navy: canvas 900 → cards 800 → popovers and menus 700. Shadows are subtle or none.

Text is off-white Navy 50 for text, Navy 300 for secondary. Pure white is only for the logo and text on danger buttons.

Theme tokens

Token	Light	Dark (navy)
--background	#FFFFFF	#0B1B2E
--foreground	#0B1B2E	#EEF3F8
--card	#FFFFFF	#12263D
--card-foreground	#0B1B2E	#EEF3F8

1024 px

Navy tile is the app icon. White and green tiles are alternatives for app stores, partner pages or campaigns. The mark sits at 60% of the tile width, centered. Use the *square* versions for the App Store and Play Store (they round the corners themselves) and the *maskable* icon for Android. Below 32 px, the small-size mark is used automatically in the favicon files.

Social & sharing

Open Graph / link preview, 1200 × 630

LinkedIn banner, 1584 × 396

Profile avatar: works as a circle or rounded square

Rules for posts and graphics

- Deep Navy backgrounds, white text, one green highlight.
- The thin navy + green bar along the bottom edge is a brand signature. Its 72/28 split echoes the done column.
- Screenshots of the product beat stock photos. Show real boards and issues.
- Uppercase tracked lines (PLAN · BUILD · SHIP) for short taglines only.

Which file do I need?

Website / app header	`logos/transparent/devtrack-logo-color.svg`
On a navy or dark background	`logos/transparent/devtrack-logo-white.svg`
Slides, docs (no SVG support)	the PNG at 1024 px or larger
Browser tab	`favicon/` + `head-snippet.html`
Phone home screen	`apple-touch-icon.png` , `android-chrome-*`
App stores	`app-icons/navy-square/…-1024.png`
Print, single color	`…-navy-mono.svg`
Developers	`theme/devtrack-theme.css`

Use SVG on screens whenever possible: it stays sharp at any size. Use PNG where SVG isn't supported.

COLORS

	Deep Navy	#0B1B2E
	Done Green	#16C784
	Mist	#F2F6F4
	White	#FFFFFF

ALWAYS

- Navy text on green buttons
- Navy backgrounds for dark mode
- Done column in green
- Clear space 2x around the logo
- One green primary action per view

NEVER

- Pure black #000
- White text on green
- Stretched, rotated or recolored logo
- Gradients, glows, shadows
- Green 500 for small text on white
